### **REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: With respect to claims 1 and 10, the examiner is withdrawing the outstanding use of DeMigis against the claims. Claim 1 has been amended to specify that the electroosmotic flow is substantially parallel to a face of the transparent electrode. Claim 10 has been amended to specify that the electroosmotic flow is substantially parallel to a face of the opaque electrode that has the transparent window. Both of these new limitations are not disclosed nor rendered obvious by the teaching of DeMigis because the electroosmotic flow being generated is substantially transverse to the face of the electrode. Claim 6 has been amended to specify that the presence of a transparent substrate having two lateral sides besides a face on which the electrode is formed and that the light incident unit is arranged to enter light through one lateral side and the light receiving unit is arranged to receive the light through an other lateral side of the transparent substrate. This is in contrast to DeMigis where the incident light and the received light would enter and outgo respectively the same side of the substrate. This is neither anticipated nor rendered obvious by the prior art. Compare fig. 2 of the DeMigis with fig. 1 of the present invention. Claims 2-5, 7-9, and 11-23 depend from these allowable claims and are also thereby allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
